AI AUTOMATED WORKFORCES : THE FUTURE OF ENTERPRISE

CURRENT METHODS ARE FAILING IN THEIR CONVERSATIONAL ABILITY AND ACCURACY...

Hours long waiting in customer care

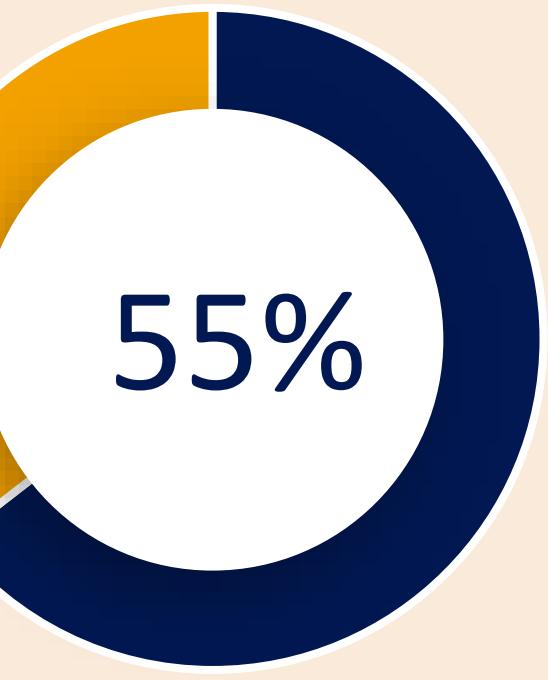

Vague Inauthentic Information

"Your call is vital to us. Please hold while we connect you"

Customers hate automated messages.

60% customer service representatives don't have right data. Even search engine and social media have inauthentic information

55% of consumers have intended to make a purchase, but backed out because of poor customer service.

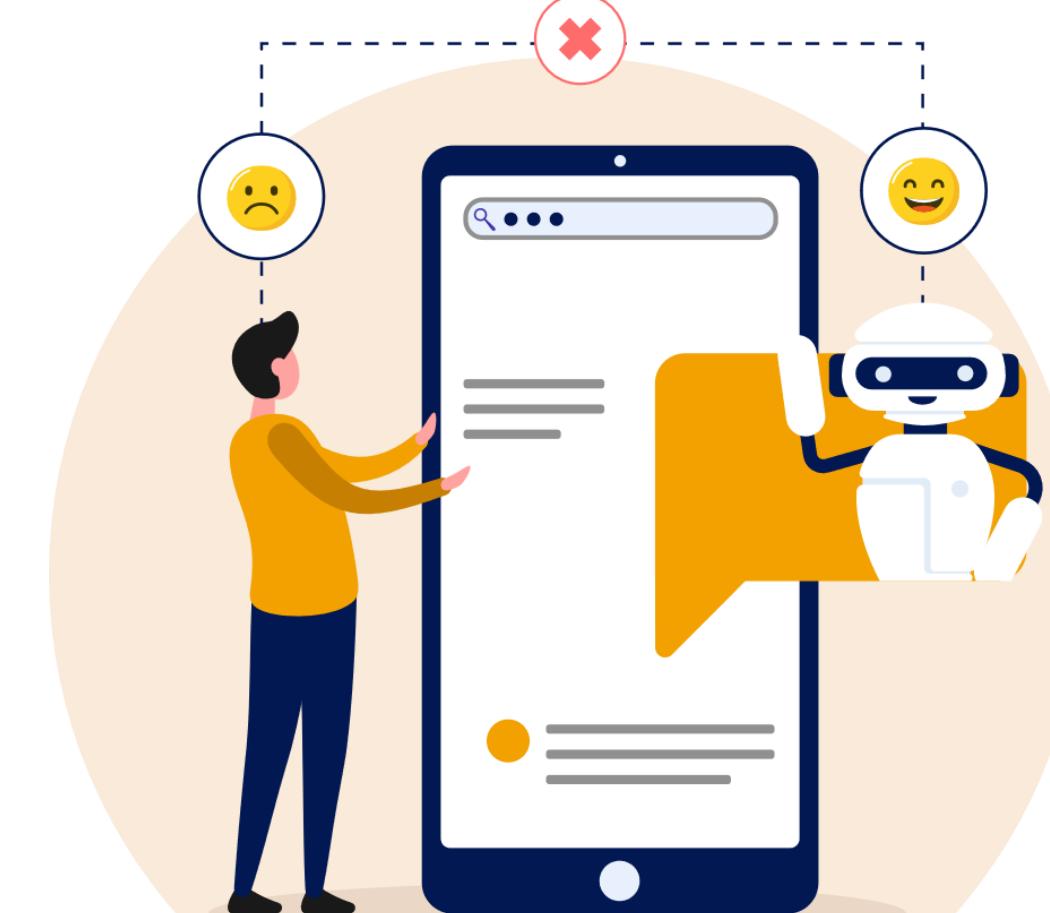

...AND MOST AI VIRTUAL ASSISTANTS DON'T OFFER RICH, HUMAN LIKE CONVERSATIONS NEEDED TO ENGAGE USERS

Lack of Contextual Training Data

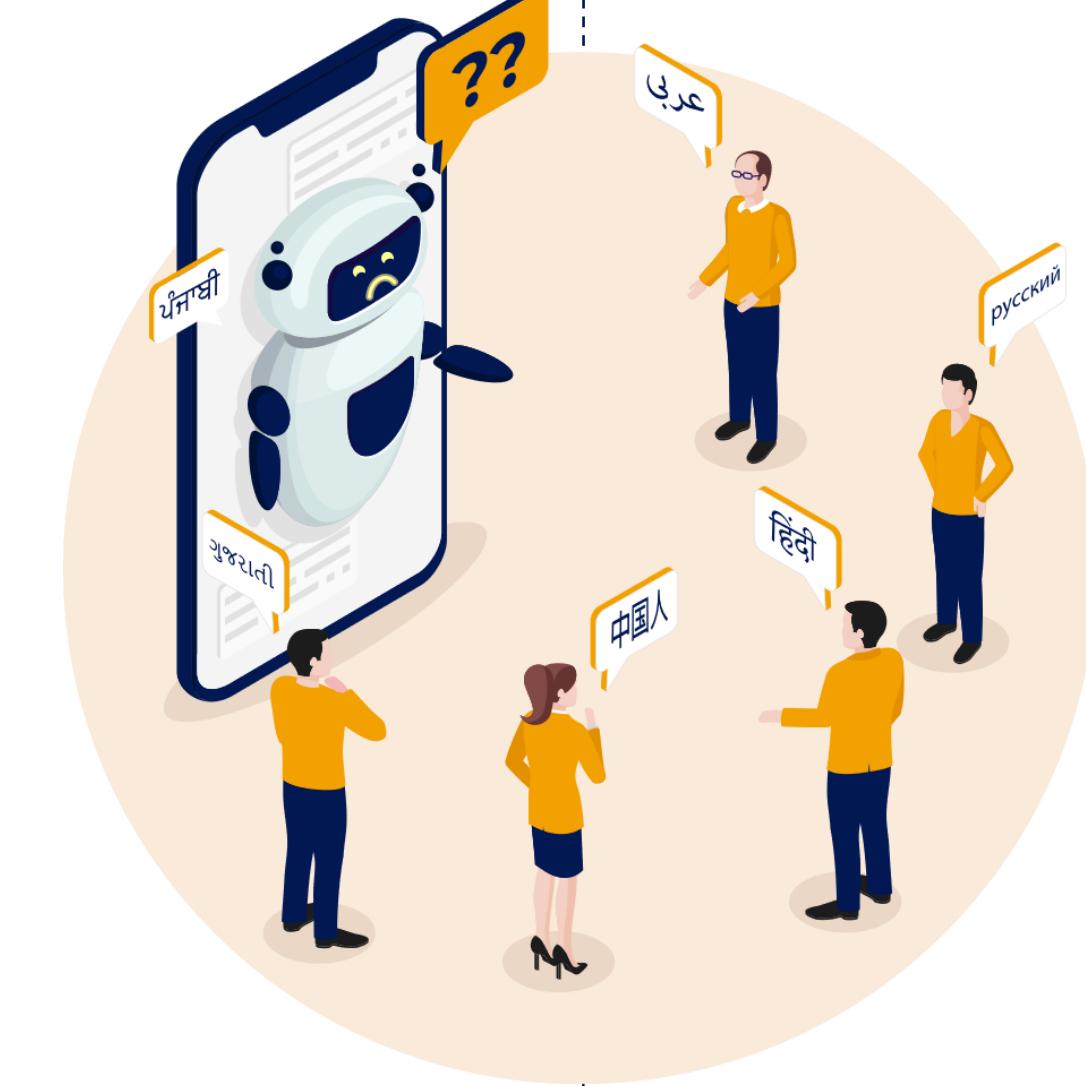

Misinterprets the requests and gives inaccurate response

No Hybrid Chat

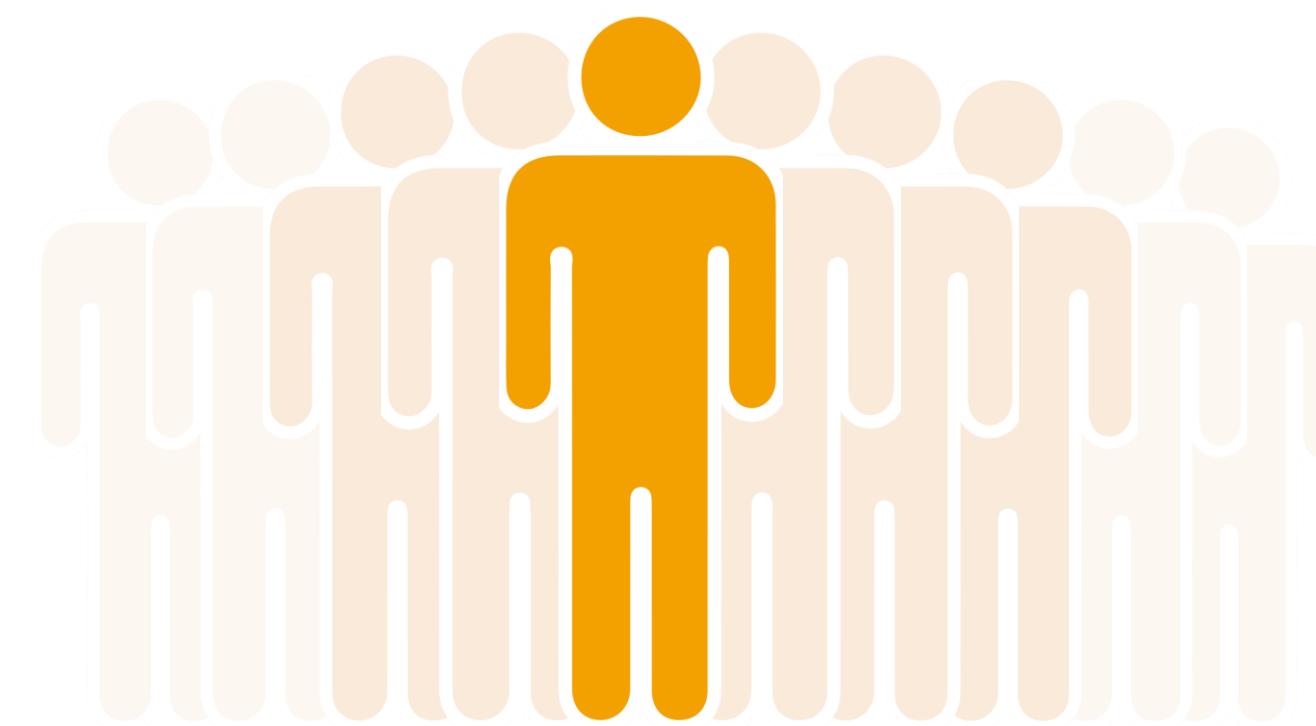

Most AI bots are incapable of sentimental analysis and providing service in format of user's choice (Text, Voice, Video)

Language Barriers & NLP

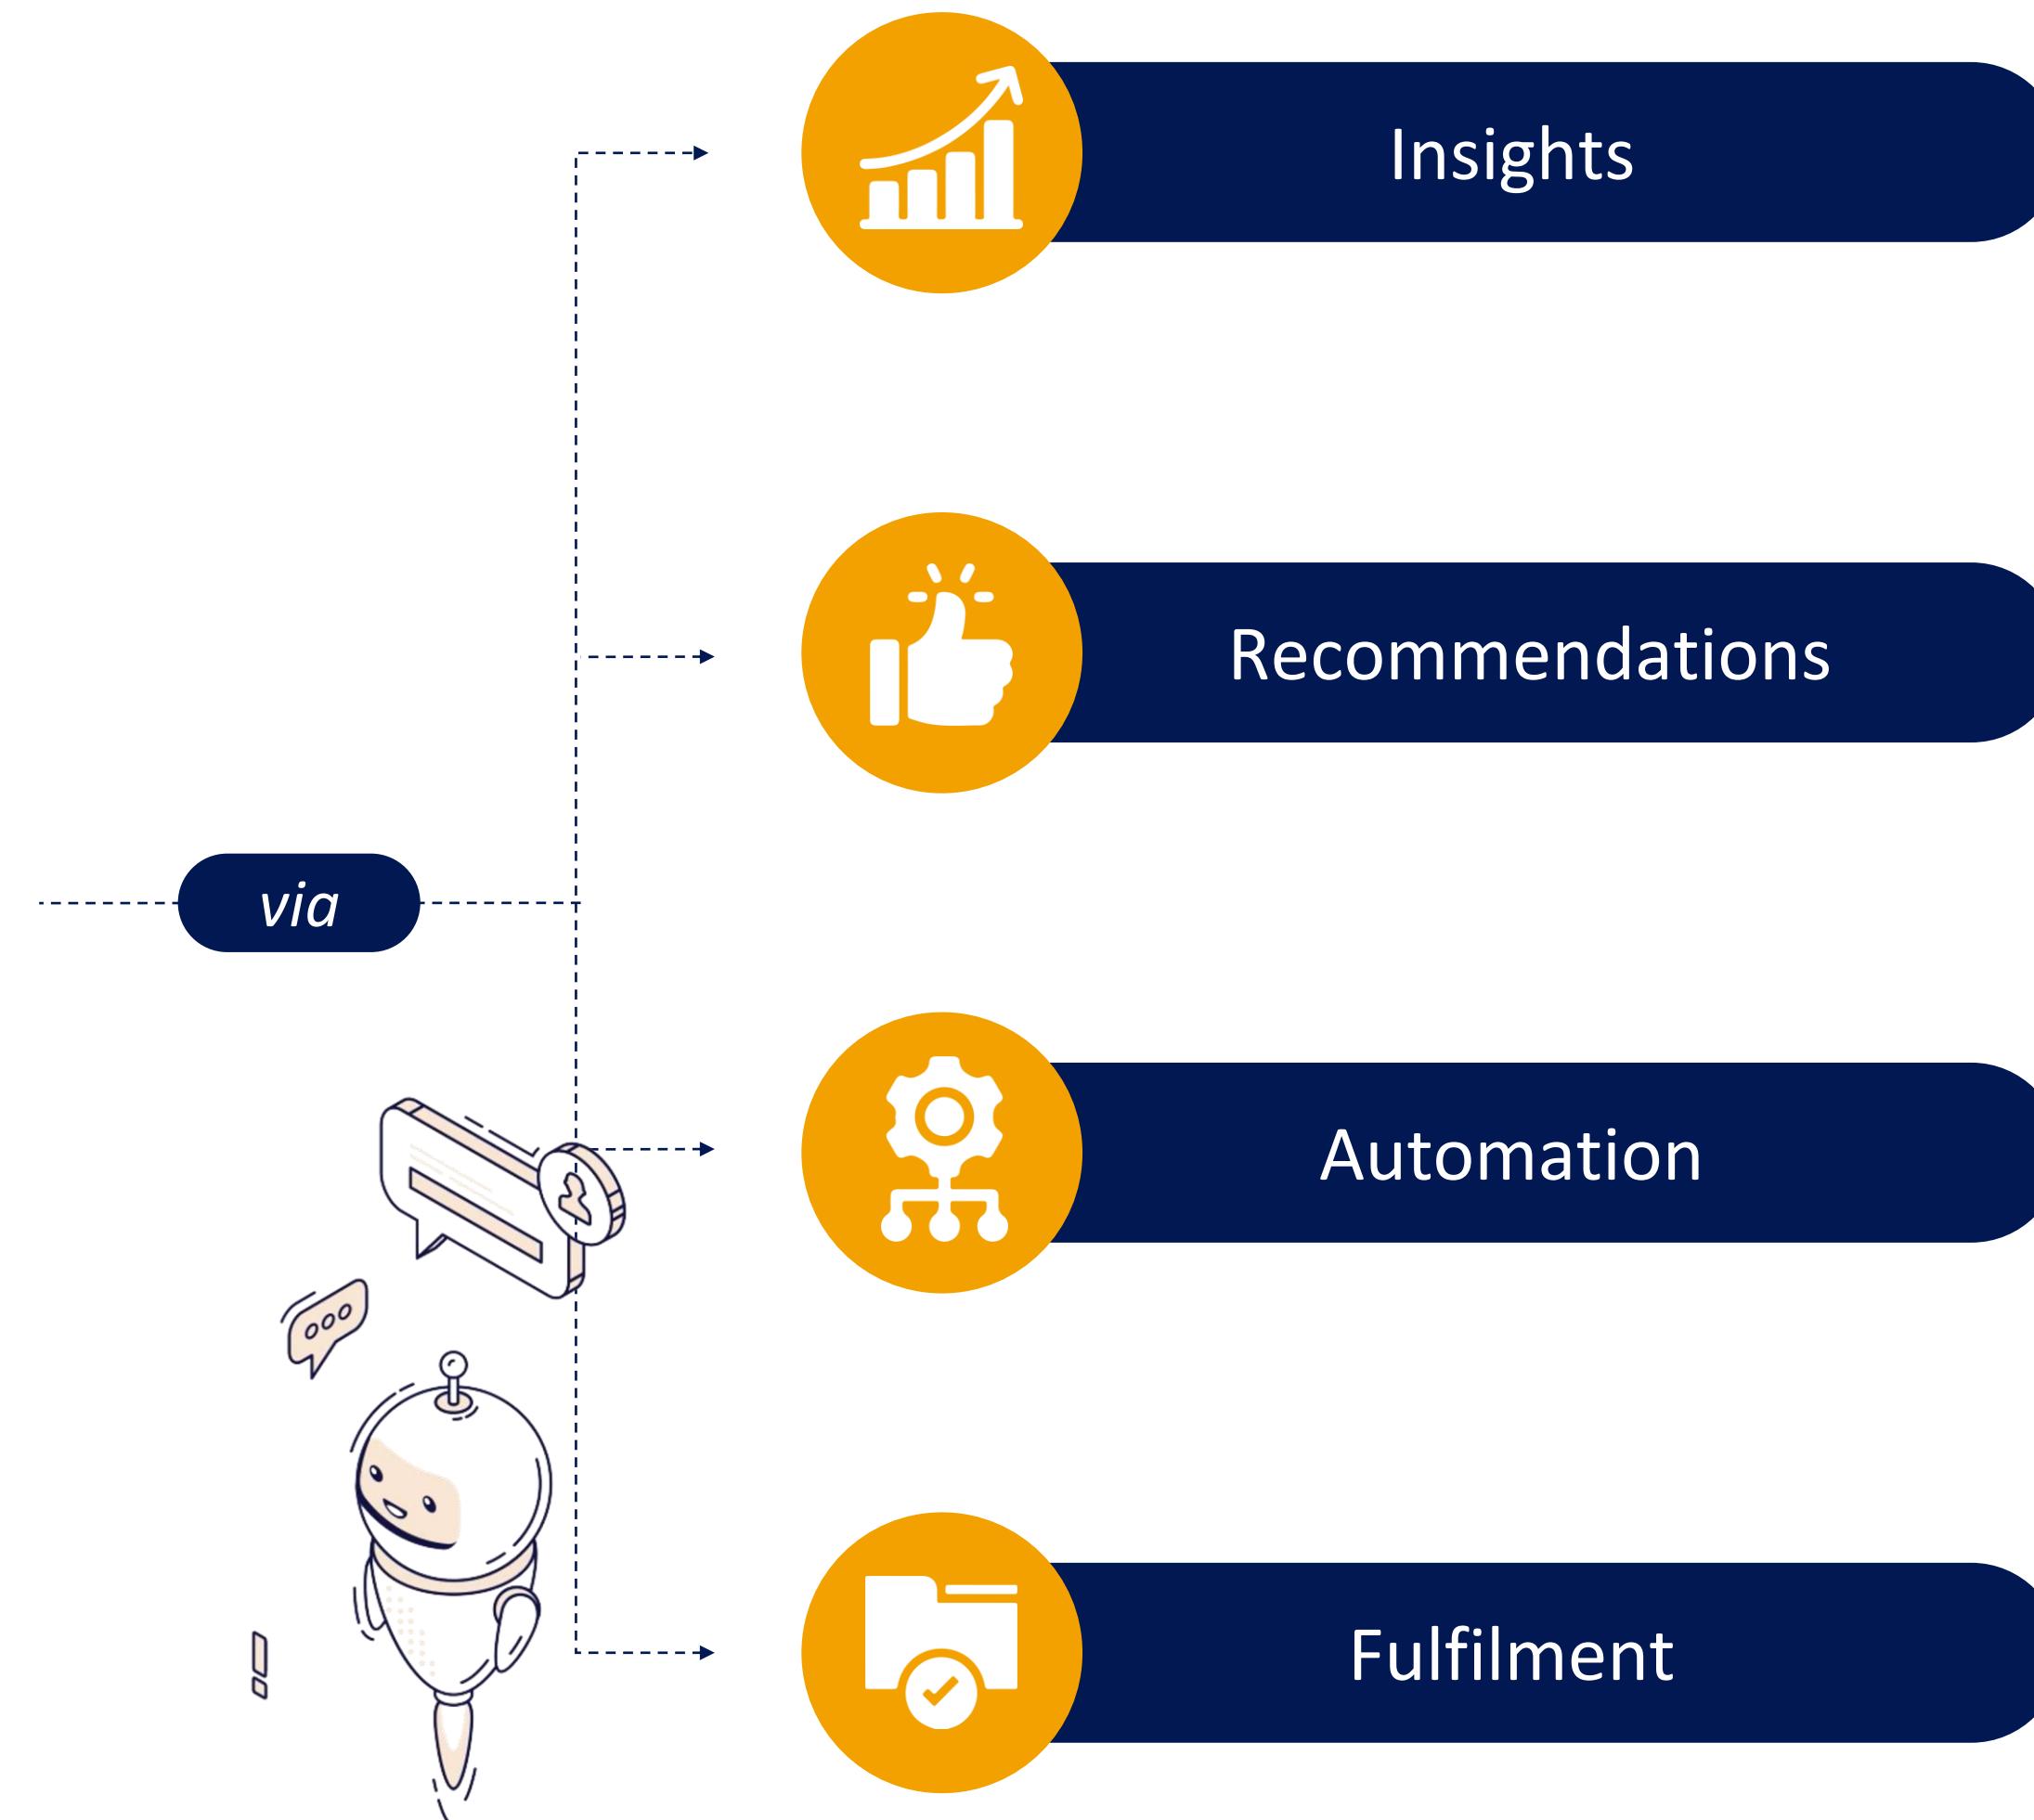

Cannot communicate problems and seek help in local languages

COROVER'S VISION TO MAKE AI AS "HUMAN-LIKE" AS POSSIBLE

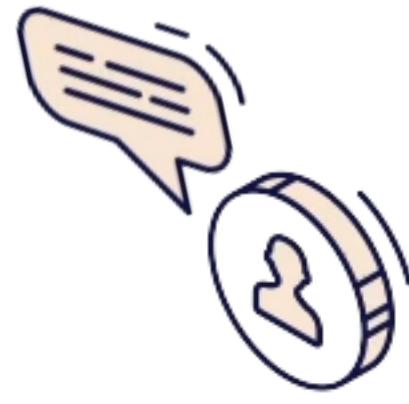

Augmenting the personal and professional lives of

1/10th
of Humans

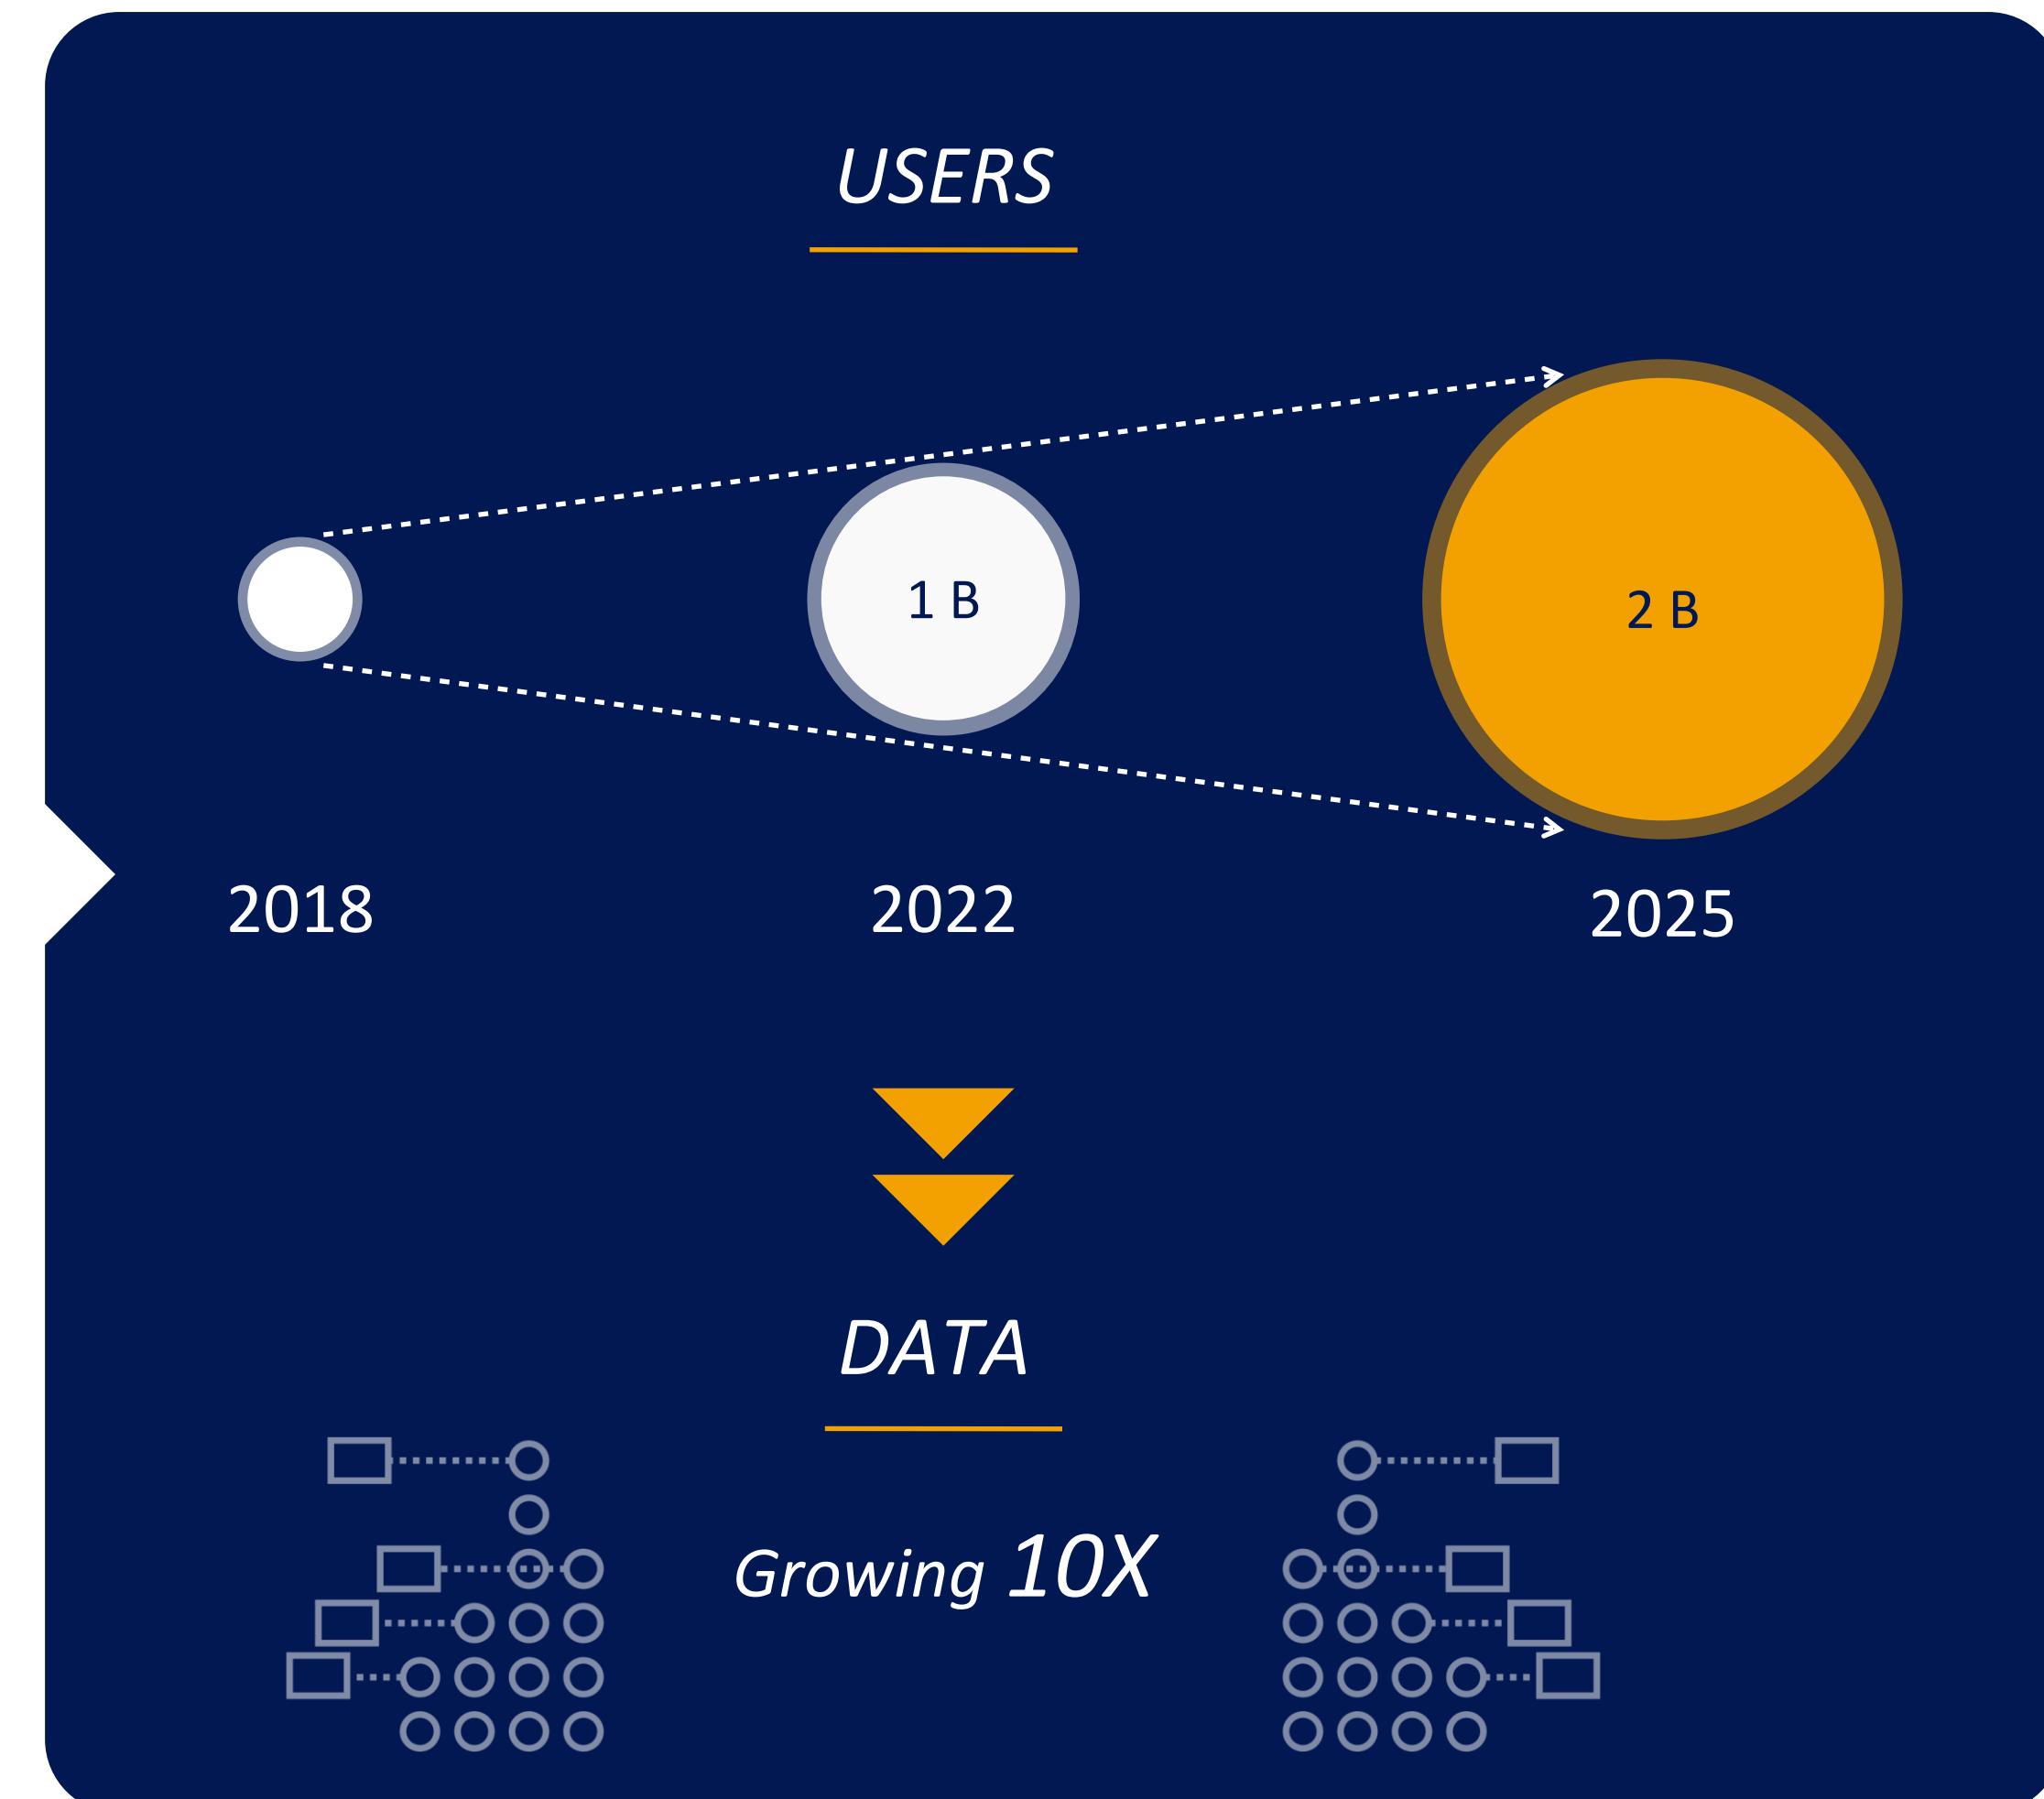

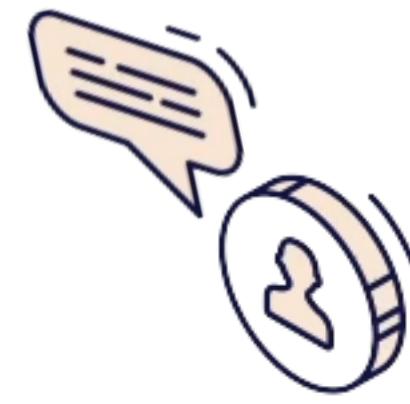

AIM TO LEAD ENTERPRISES TO THEIR AI-DRIVEN FUTURE

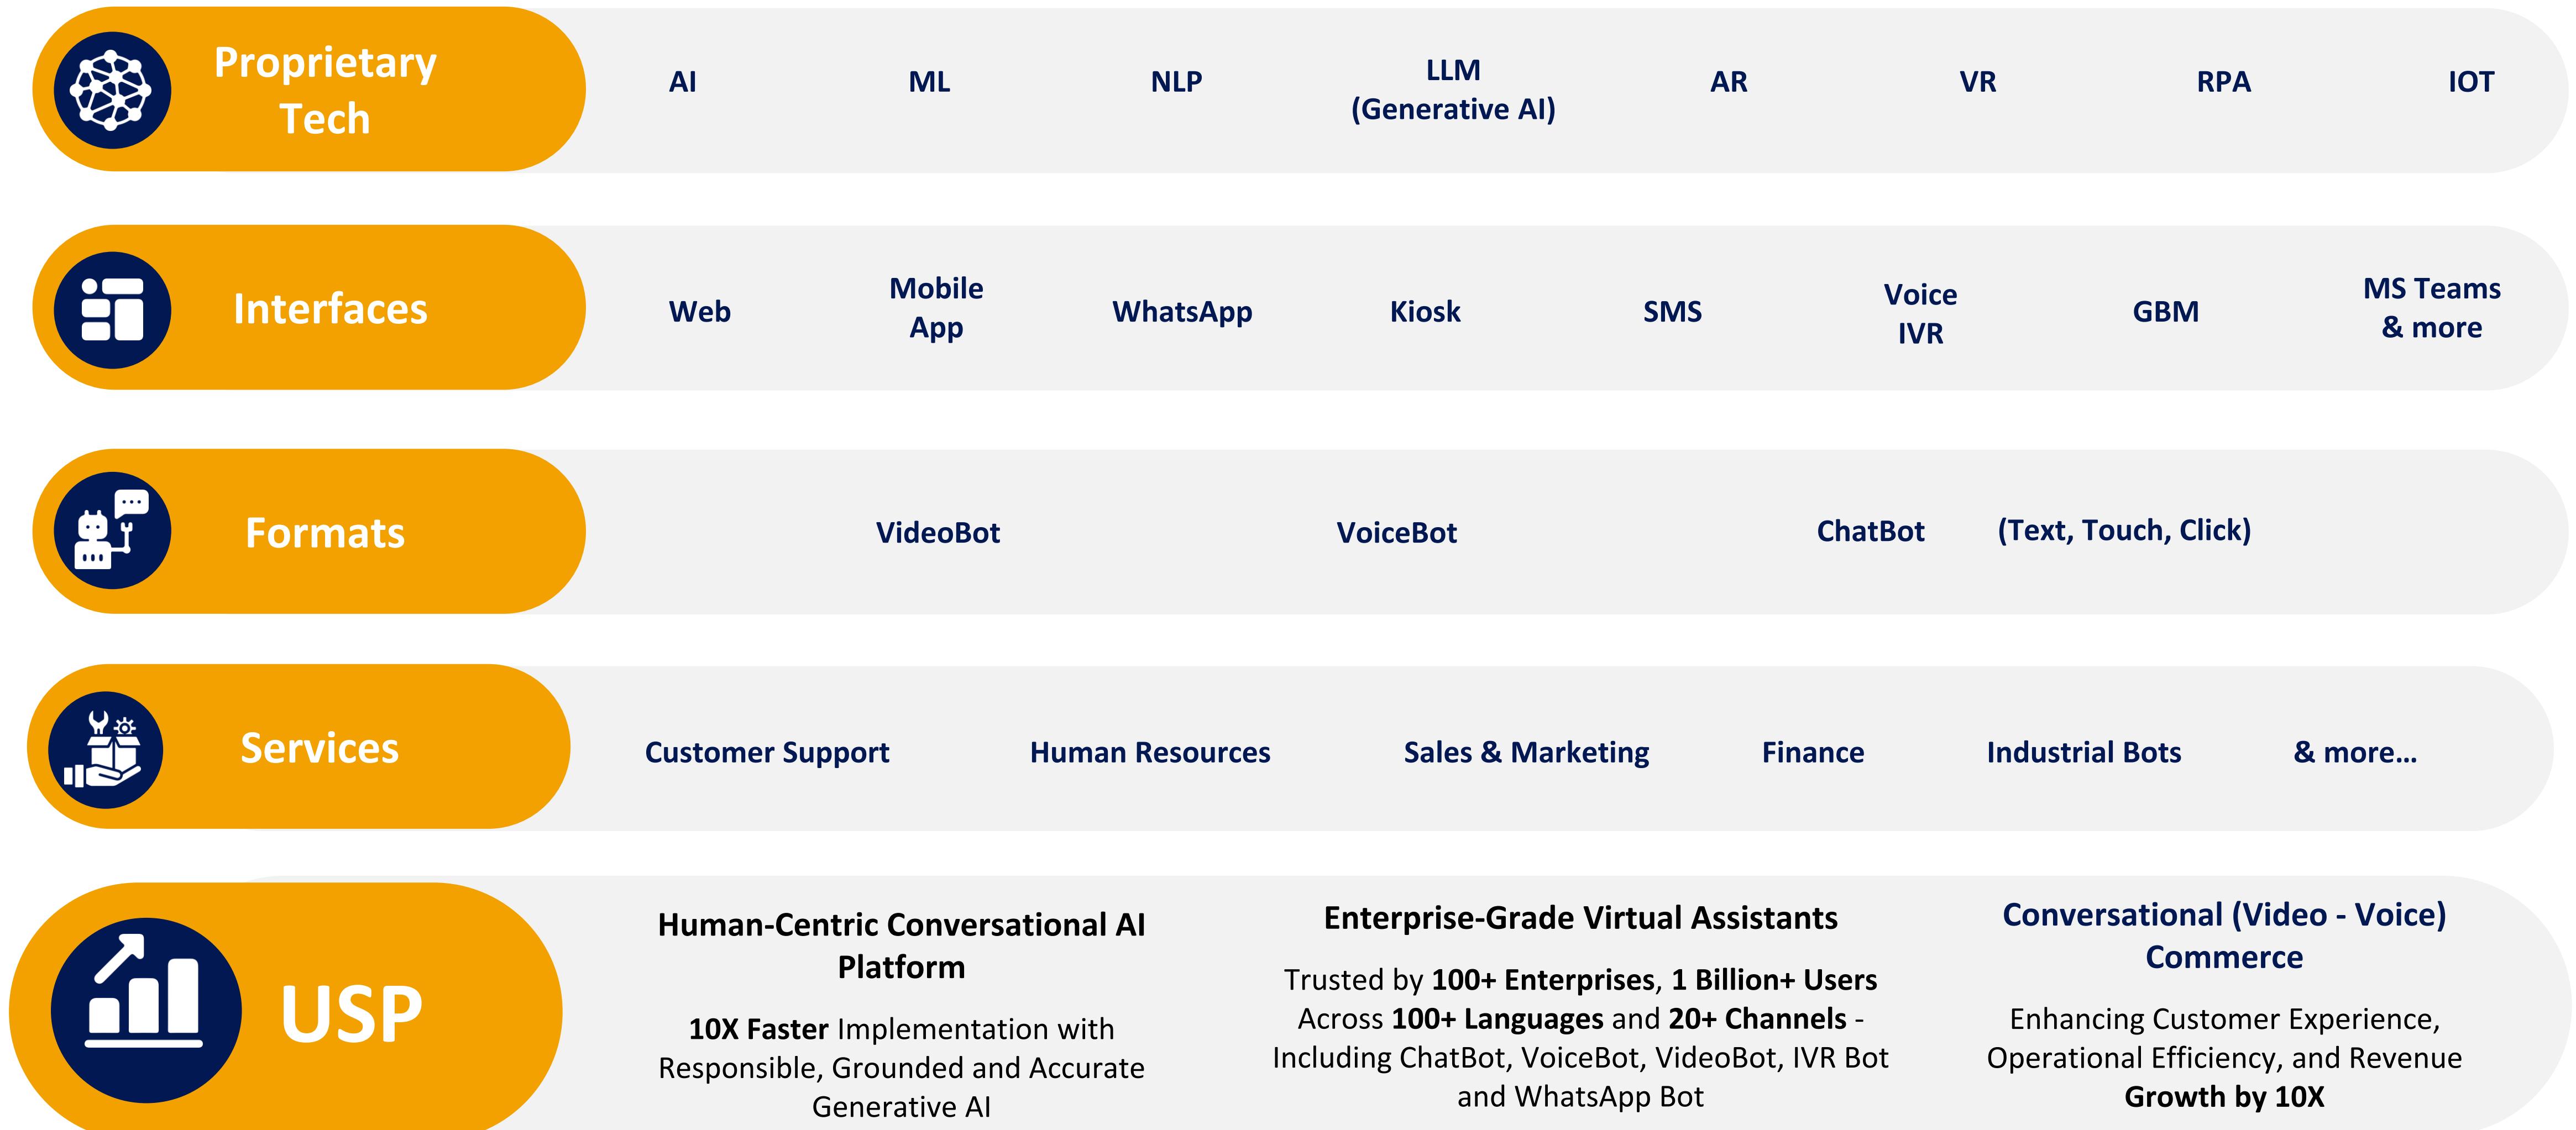

POWERING THE DATA FLYWHEEL

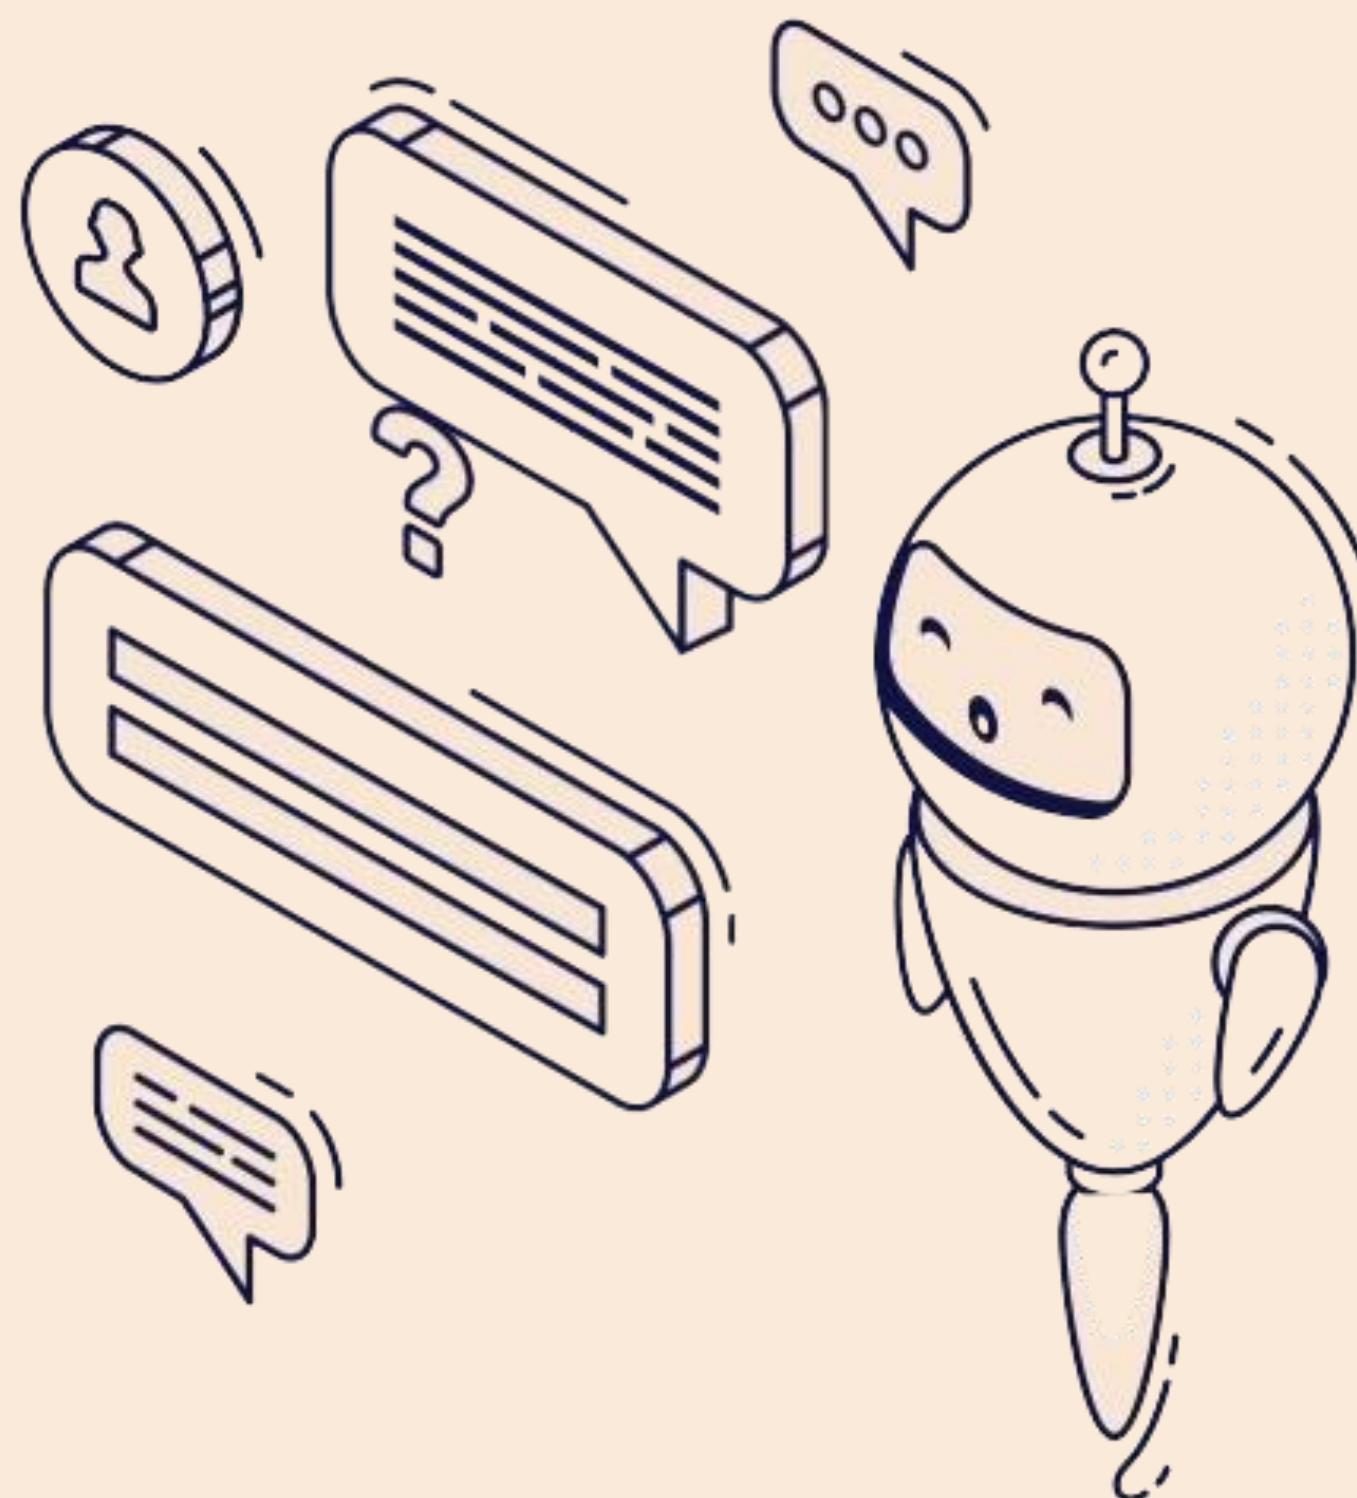

Data is at the heart of conversational AI, and is used to personalize the conversation

CoRover's Large Language Model (Generative AI)

The background image shows a panoramic aerial view of a bustling city. In the foreground, a multi-lane highway with several cars is visible, flanked by green trees. To the left, there's a mix of residential and commercial buildings, including a prominent tall building with many windows. On the right, a dense cluster of modern skyscrapers reaches towards the sky. The overall scene conveys a sense of urban development and technology.

India's Answer To The Existing Generative AI Systems

India is launching its own Generative AI (Large Language Model) in 12+ Indian languages, with generative text, voice and video

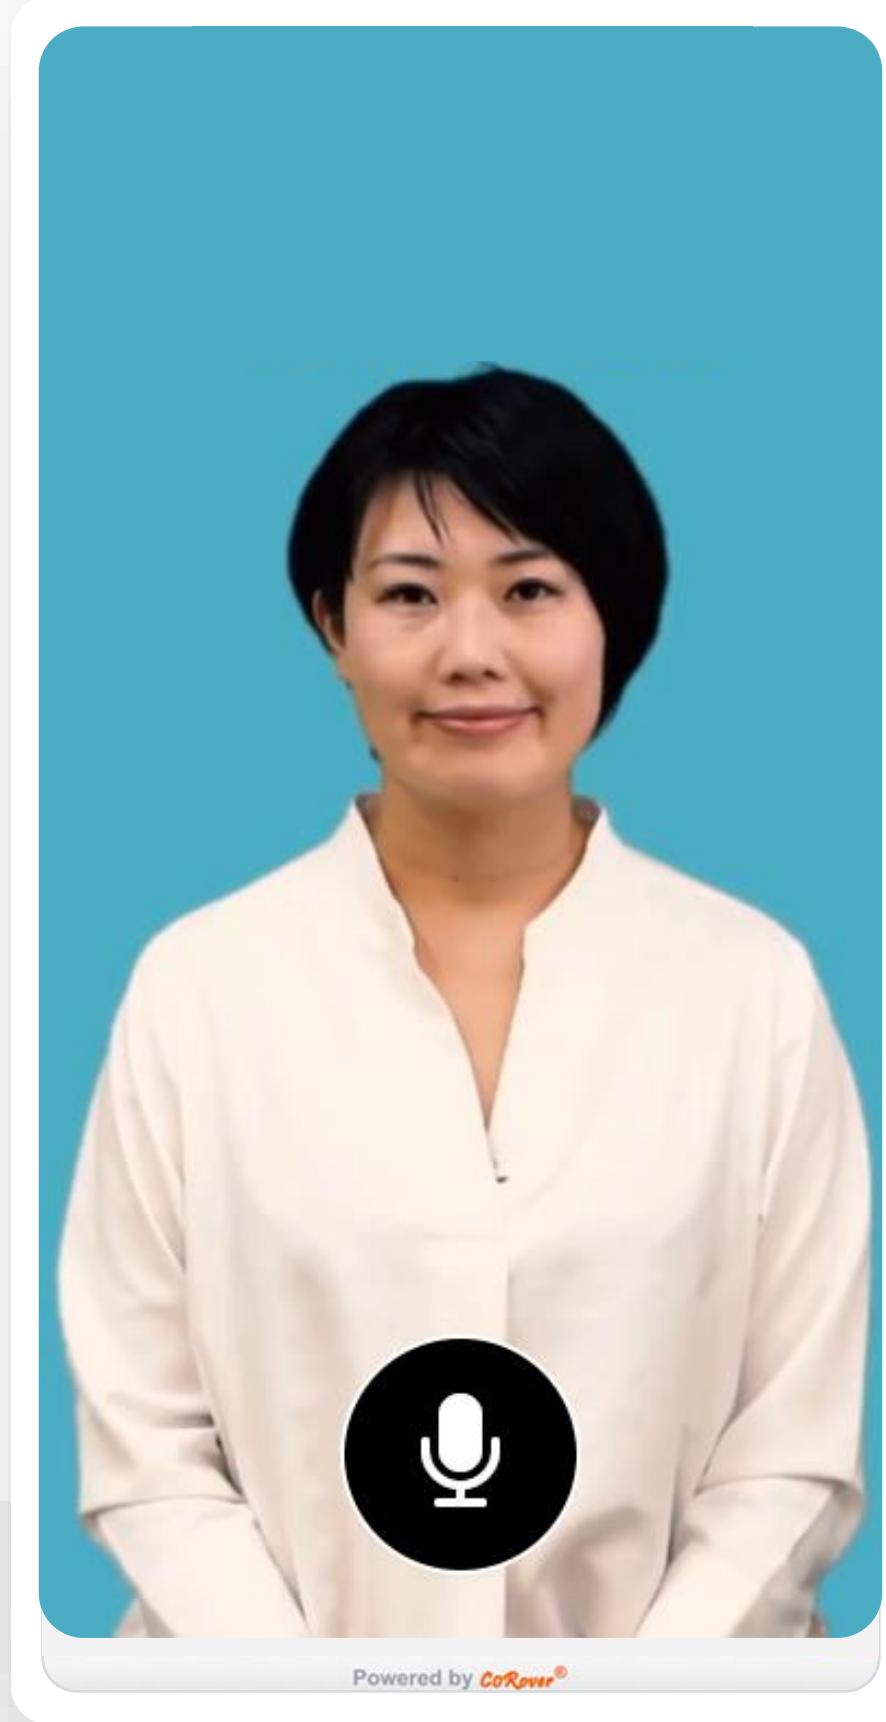

Highlights

1. Data remains in **India**
2. Fine tuned for **Indian users**
3. In-line with current government vision of “**Make AI in India, Make AI work for India**”
4. Option to add **custom knowledge base**
5. Option to integrate with any **ERP/CRM system** and **APIs**
6. Inbuilt **payment gateway** for **real-time transactions**
7. **Dialogue/conversational** management tool
8. **Omni-channel, multi-lingual** (120+ languages), **multi-format** (text, voice, video)
9. **Generative AI Video**, interactive **digital twin**
10. Currently available for **organisations**

banking queries

VIRTUAL ASSISTANT BUILDER

SELF SERVICE PLATFORM - VIRTUAL ASSISTANT BUILDER

The screenshot displays the CoRover.ai Virtual Assistant Builder interface. At the top, there are navigation links: BharatGPT (Gen AI), Test Bot, Configuration, Train Bot (Classic NLP), Small Talk, Generate Video, Add Substitution, Analytics, and Integrations. On the far right are buttons for DEMO BOT, HOME, and POWER.

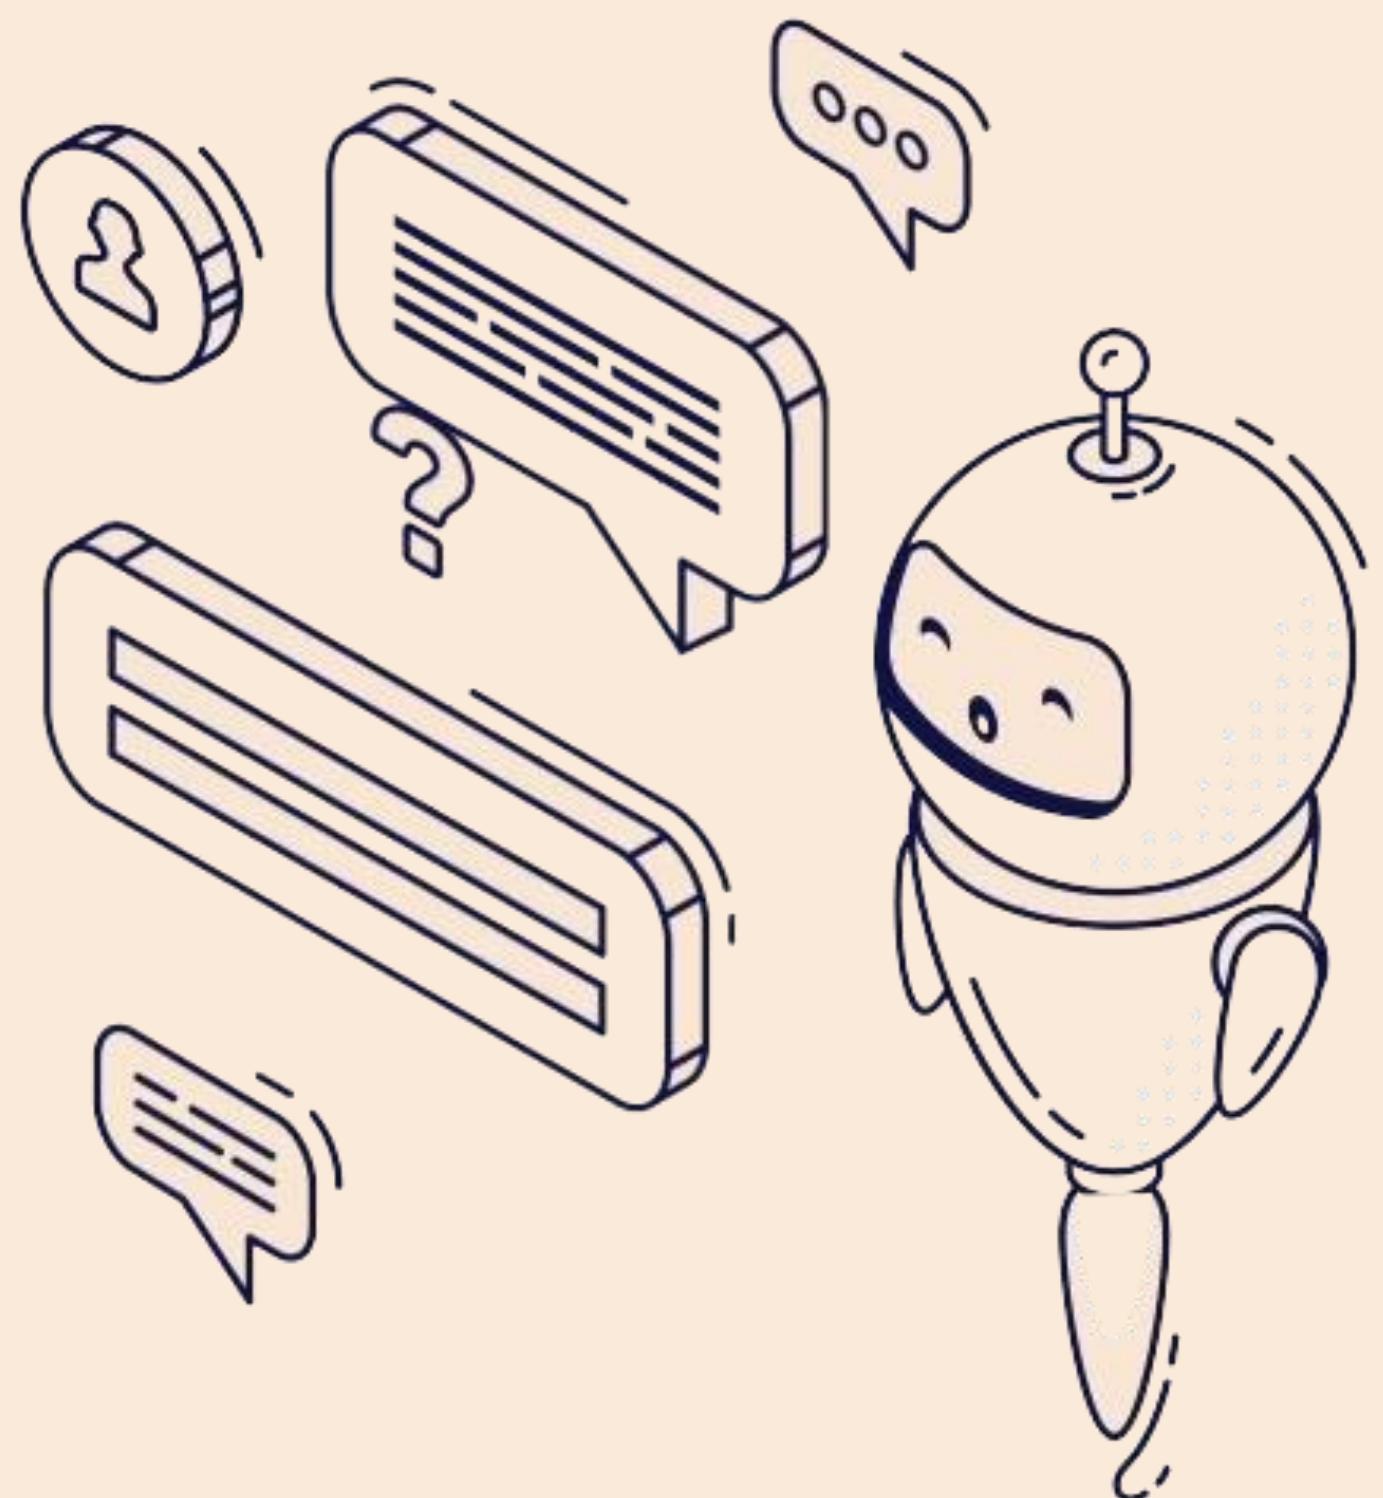

The main area is titled "Train Chatbot" and contains the message: "You can train your chatbot by adding intents." A sidebar on the left lists "Intents" under "Types_Elections". One intent, "What are the Types of Elections In India?", is expanded, showing a list of election types: General Elections in India, Local Body Elections in India, Rajya Sabha Elections in India, Vice-Presidential Elections of India, and Presidential Elections of India. Below this is a video player showing a person speaking.

A central modal window titled "Add Elements" prompts "Please select element for response." It lists several options: Response (Auto Response, Auto Response, Auto Response, Auto Response, Video, Button, Link), Bard / VertexAI, ChatGPT, and For Videobot. To the right of the modal, the question "What are the Types of Elections In India?" is displayed with a response containing a numbered list of six types of elections in India.

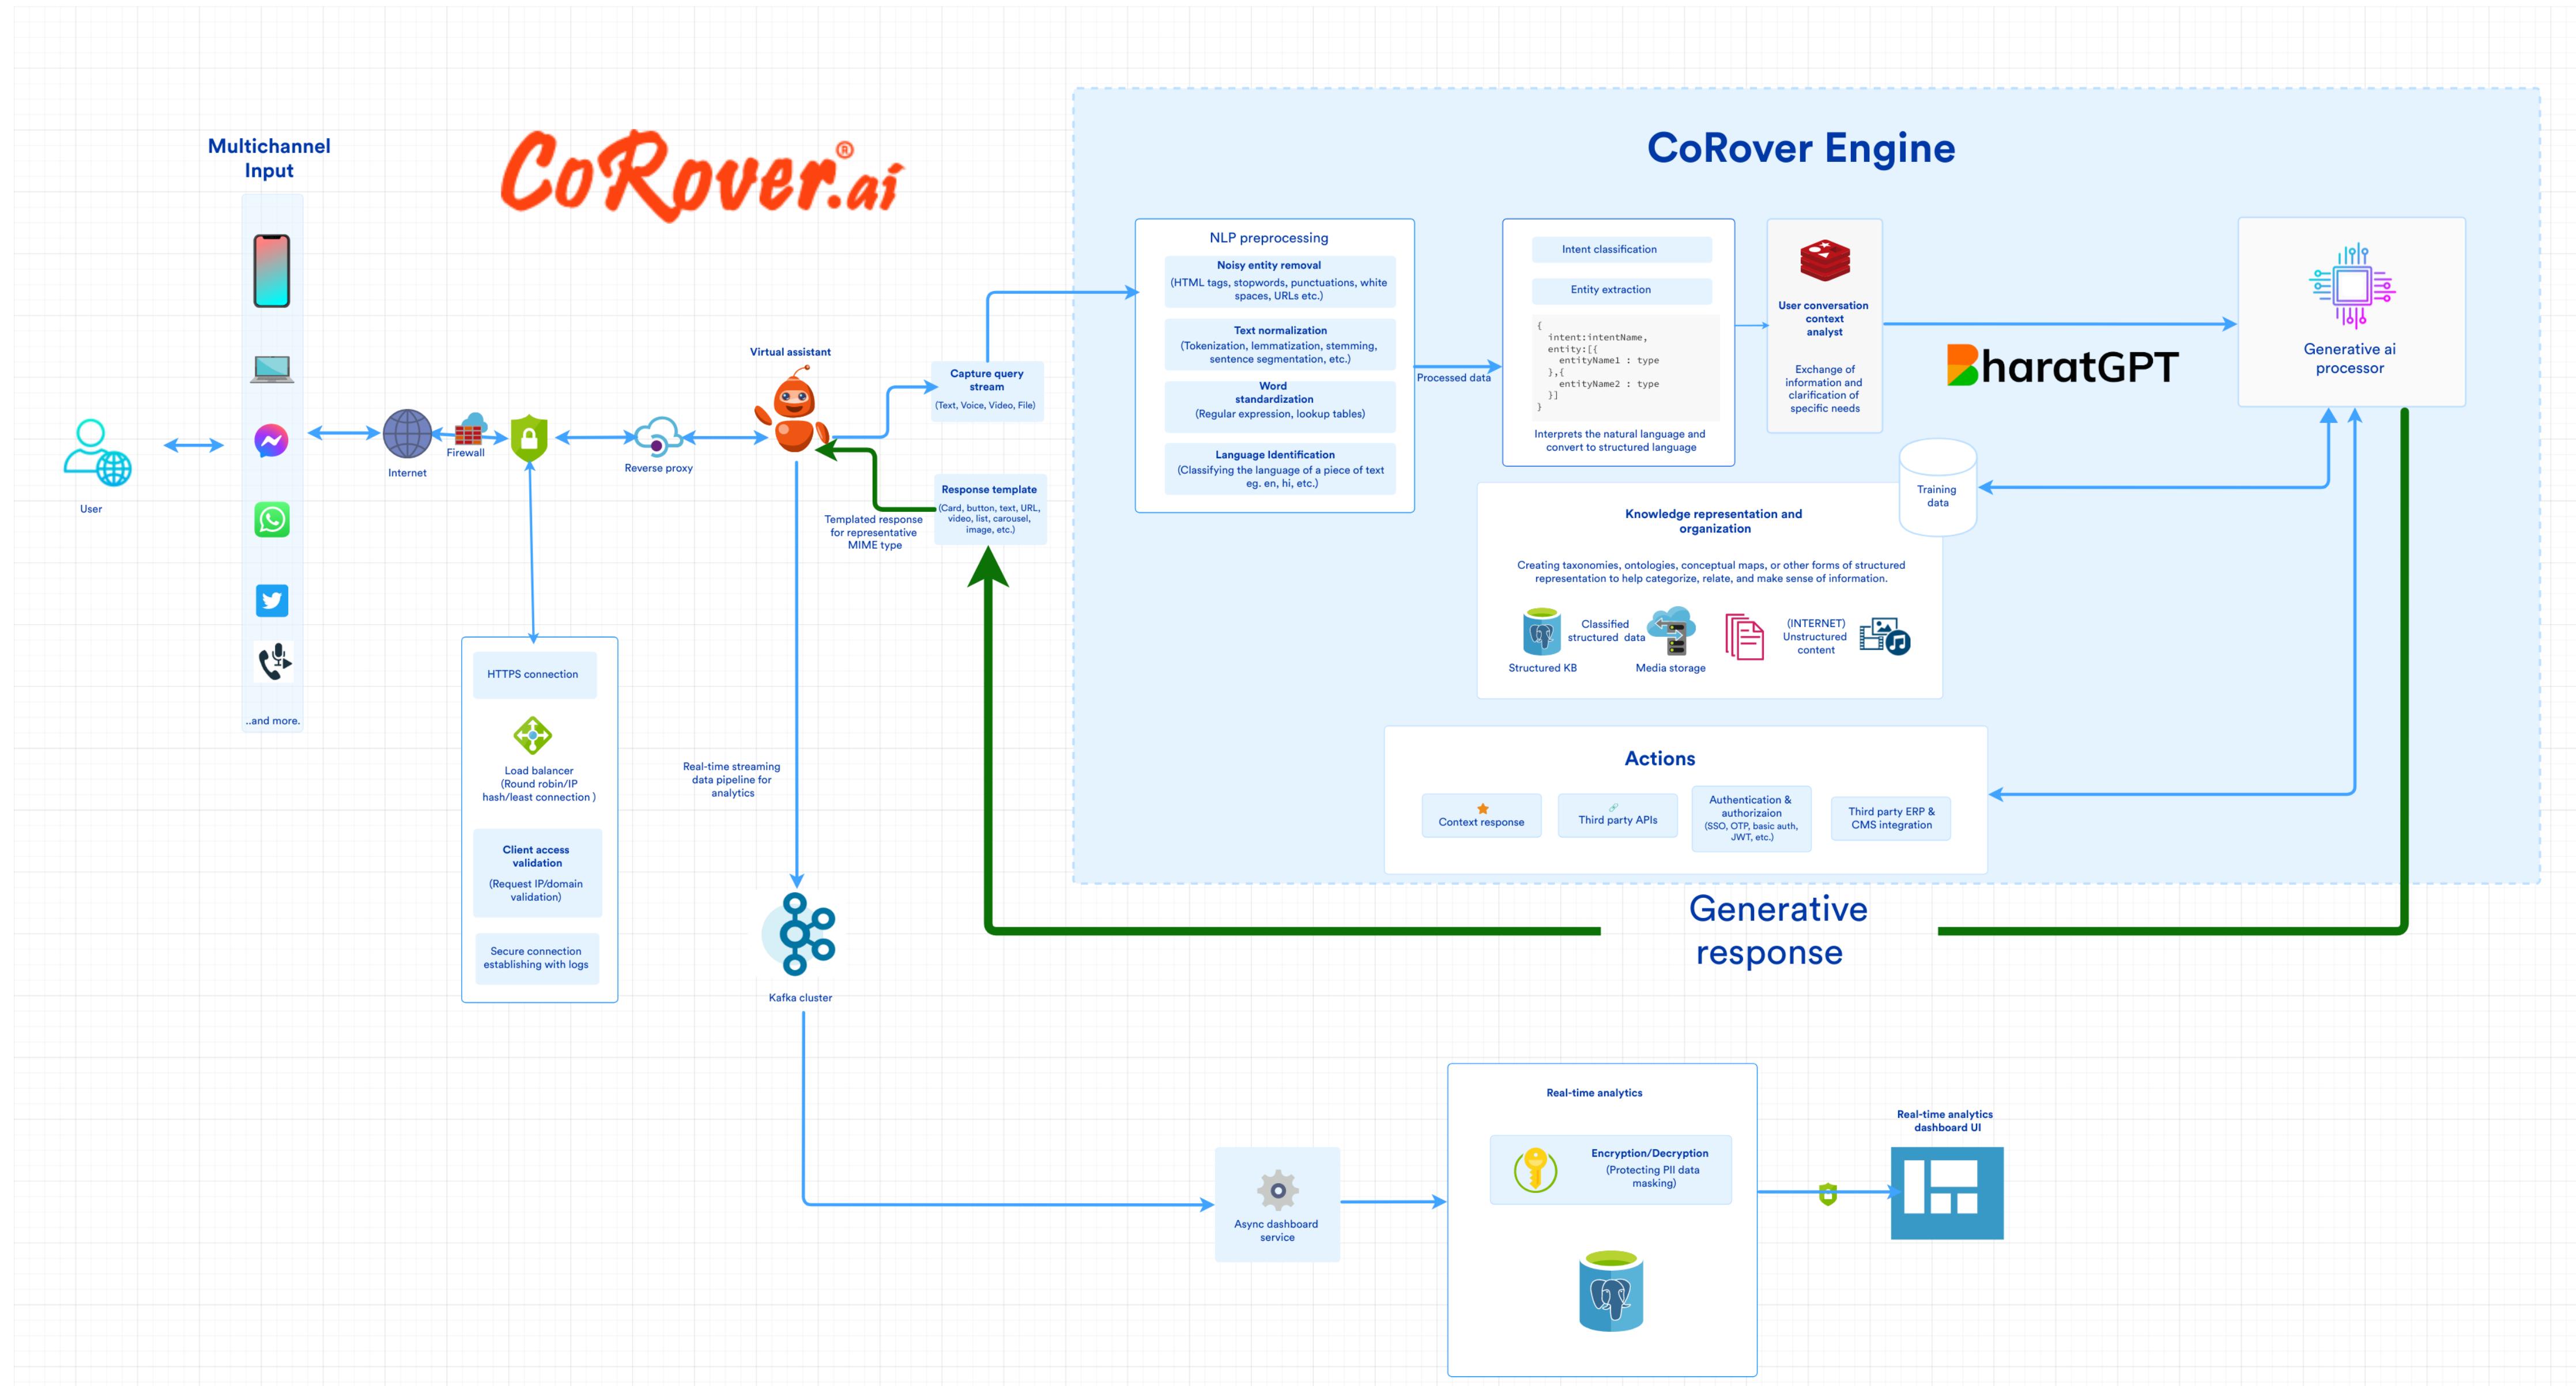

On the right side, there is a "Buttons" section listing five buttons corresponding to the election types: General Elections in India, Local Body Elections in India, Rajya Sabha Elections in India, Vice-Presidential Elections of India, and Presidential Elections of India. Each button has edit and delete icons. A "CREATE AUDIO" button is also present.

At the bottom right of the interface is a large blue "SAVE INTENT" button.

CASE STUDY – ‘Ask Maitri’ by IGL (Energy/Utility)

The screenshot shows the 'Ask Maitri' app interface. At the top, there's a green header with the app logo and name. Below it, a message from the bot says 'Namaste,' followed by a detailed welcome message about being a virtual assistant for IGL. A 'Frequently Asked Questions' section is visible with links for raising complaints, outstanding bills, gas leakage reports, new connections, payment modes, and self-billing/meter reading. A large orange box at the bottom displays a customer query: 'Your outstanding amount is Rs 580.00. Due date is 30-06-2021.' Below this, there's a 'Customer Queries' section with a 'BP Number' input field and a 'Ask your query here' button. The footer indicates the app is 'Powered by CorPover®'.

This screenshot shows a WhatsApp conversation with 'IGL's AskMaitri WhatsApp'. The user asks about their outstanding bill, and the bot requests a 10-digit BP number or registered mobile number. The user provides the number '5000155440'. A yellow callout box titled 'Multiple Formats' shows icons for phone, Facebook, and email. The bot then asks the user to choose between the shared number, BP Number, or registered phone number. The user replies with 'BP Number'. The bot then asks if the connection is in the name of Mratunjay Tewari, with a response showing the address: 'address 1137, 11TH FLOOR, NOIDA SECTOR 79, NOIDA, Uttar Pradesh, 201306?'. The user replies 'Yes/No'. A second yellow callout box titled 'Conversational Chatbot' features a stylized robot icon. The conversation continues with the bot confirming the information and asking if there's anything else it can help with.
